## **DETAILED ACTION**

### ***Election/Restrictions***

1. Newly submitted claims 31-39 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The structure of claim 31 is different from the original claimed invention.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 31-39 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 2, 4-12, 14-18, 20 and 22-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims fail to provide a tangible result, and there must be a practical application, by either

- 1) transforming (physical thing) or
- 2) by having the FINAL RESULT (not the steps) achieve or produce  
a useful (specific, substantial, AND credible),  
concrete (substantially repeatable/non-unpredictable), AND

tangible (real world/non-abstract) result.

A claim that is so broad that it reads on both statutory and non-statutory subject matter, must be amended.

If the specification discloses a practical application but the claim is broader than the disclosure such that it does not require the practical application, then the claim must be amended. A claim that recites a computer that solely calculates a mathematical formula is not statutory.

As per claim 1, "the leaf providing the attribute and retrieving the attribute fails to establish a tangible results the is no conclusion to as the result has a practical application.

As per claims 18 and 23, step 3 fails to establish a tangible results because the is no conclusion to as the result has a practical application.

Claims 2, 4-12, 14-17, 20, 22 and 24-30 also fail to establish tangible results.

Therefore, the claimed invention is directed to non-statutory subject matter.
